15	61	**34**	138	**53**	214	**72**	291
16	65	**35**	142	**54**	219	**73**	295
17	69	**36**	146	**55**	223	**73.4**	**297**
18	73	**37**	150	**56**	227		
19	77	**38**	154	**57**	231		

How to read it: the liquid is held in the inner tank (VTB00300-035, 35" diameter). Measure the liquid depth straight down from the surface to the inside bottom of the inner tank, in inches, and read the gallons beside it. The chart runs to the top of the inner tank's straight sidewall (73.4", in red).

Above the sidewall: the dome above the straight wall holds more, and the tank may be filled "brim full" with care. That extra volume is not charted.

Accuracy: calculated from the inner tank's dimensions with a nominal 1/4" wall. PVDF also moves slightly with temperature, and wall thickness varies from tank to tank, so actual volume can differ from this chart by a few percent. The first inch near the bottom corner holds slightly less than shown. Use the chart as a close guide, not for custody transfer or billing.

Outer tank VTBDC300-48 (48" diameter, 78" overall height, Bailiff drawing VTBDC00300-48.pdf). Inner tank sizes from the Bailiff drawing for VTB00300-035. All dimensions in inches.
